

Hannah Lewis, UW GCGP '25 (she/her)

Genetic Counseling student

I am so excited to join the LEND program because as a genetic counselor, my goal is to ensure all patients feel supported and comfortable with the care they receive in the healthcare system. I recognize neurodiverse individuals require unique supports in order to receive the best possible quality of care. The tools and experiences gained through LEND will allow me to hone the skills required to support these patients and their families. In my free time I enjoy trying out new recipes, going hammocking with a good book, and trying out new coffee shops.
