

Winnie Monohan (she/her)

Genetic Counseling, MS

I grew up in Vancouver, BC and have lived in various cities on the East and West Coasts before ending back in the PNW. Patient advocacy is a great interest of mine, and I am looking forward to learning from our multidisciplinary LEND cohort and how to support our patients and their families in practice. Outside of school, I enjoy spending time with my family, experimenting with new recipes, exploring the outdoors and all forms of puzzles (jigsaw, crossword, Wordle).
